

CCAC (Clean Climate & Air Coalition Project)

The Climate and Clean Air Coalition Project to Reduce Short-Lived Climate Pollutants (CCAC) is a voluntary global partnership of governments, intergovernmental organizations, business, scientific institutions and civil society committed to catalysing concrete, substantial action to reduce SLCPs (including methane, black carbon and many hydro fluorocarbons). The Coalition works through collaborative initiatives to raise awareness, mobilise resources, and lead transformative actions in key emitting sectors. TERRE Policy Centre has signed a MOU for the project and conducted 2 courses in 2020 and 2021 respectively.
